#### ARTIST RESUME

I have worked professionally in Photography for more than 25 years starting in 1959 or 1960. In all that time I was taking pictures for myself as well. I have been exhibiting since 1972, off and on to the present time.

I have published a few articles, illustrated by me, and have had a few articles published about me. A few of my Photographs have been published, some personal, some commercial.

I have has some teaching experience and once got a small grant.

My education is a combination of on the job training and being self-taught. My main interest is Photography for personal expression and have been doing this for more than 45 years.
